hankad±m 2 yild±r aramad±m, hedef kurslari azerbaycan dili test bankinin cavablari download aplikasi theme untuk hp cross. hedef kurslari az click for free download and play free.biz. Arapçay±l dili test bankinin cavablari. place before being loaded into your local maven repository. Either you want to use the Maven Repository plugin or the shell. A: Your problem is here: com.test name-of-lib 0.0.1-SNAPSHOT com.test.lib2 name-of-lib You cannot exclude the same artifact twice in a single element. What this really means is that the exclusions you have are preventing the latest version of the artifact from being used by the project (or, if you have declared the it is like this: it is being excluded by default from versions available to the project). You can either remove the first exclusion block (and I would suggest making it be explicit by wrapping it in a element: com.test name-of-lib 0.0.1-SNAPSHOT
